

916 Supervisor

Mobile Display Software

Description

916 is Trend's latest Mobile Display Software. It works with hardware platforms running Microsoft Pocket PC, and provides an interface with the Trend system for monitoring and adjustment of parameters within Trend controllers.

916 communicates with IQ1xx, IQ2xx, IQ3xcite and IQ3xact controllers, as well as IQL terminal unit controllers.

916 is designed to make Trend system interaction even easier, and more responsive. It uniquely saves time and assists users with prioritising service calls, by enabling an operator to dial in remotely (hardware allowing), check the importance of an alarm, and decide the best course of action or which call to attend first.

Key Benefits

- Specifically designed for mobile users
- Provides access to a Trend system wherever and whenever required
- Sits seamlessly within intuitive environment of pocket PC market
- Cost effective platform compared to laptops

Key Features

- Access to parameters in all IQ and IQL controllers
- Connects via PSTN land line, GSM mobile phone and TCP/IP over Ethernet
- GSM compatibility
- Logs recorded data for 'off-line' analysis
- Phone book for simple site number management
- Display of alarms
- Wireless ethernet capability
